Smart Controls Inside and Out

Unique architectural spaces call for visual drama; water features expect bold effects, and landscapes demand dynamic saturated colors. Architectural luminaires by Hydrel bring communities together with extraordinary evenings with modern digital lighting control systems.

Discover the Hydrel family of RGB, RGBW and Quad Tech luminaires with DMX and DMX/RDM solutions. Imagine a full palette of colors for your lighting design. Easily install and seamlessly control any lighting design - certified to work effortlessly.

Control Systems

The Dynamic Saturated Color Required for Your Design

Hydrel has taken advantage of Architainment Color in its outdoor luminaires. Architainment Color takes the classic dynamic lighting effects so often seen in themed or theatrical settings and makes it accessible for mainstream commercial applications. Architects and lighting designers now have the ability with Architainment Color to create bold, transformational effects for everyday spaces.

DMX/RDM Controls

Installation is easy with Remote Device Management (RDM) technology and is available as an option in all Hydrel RGB, RGBW and Quad Tech luminaires.

Installation and configuration required upfront design and coordination to pre-program each luminaire, limiting set locations. RDM technology eliminates the previous complexity, allowing the ability to program and re-program any luminaire quickly and easily in the field.

RDM controllers offer an easy-to-use interface. Using industry-standard DMX-512, RDM controllers offer limitless options from simple pre-set shows to complete manual control to create the desired lighting effect in any application.

Hydrel provides DMX controllers exclusively for architectural lighting.

A+ Certified

Some configurations are A+ capable and can be part of an A+ certified solution. A+ Certified solutions from Acuity Brands help you quickly and confidently select and implement lighting systems, for indoor or outdoor applications, that are both compatible and consistent.
